

ICROFS bestyrelse har givet tilsagn til følgende Organic RDD 7 projekter:

Projekt titel	Projektleder	Forventet tilsagn (DKK)
Boosting local production of organic high quality grain (BOOST)	Lone Andreasen, Innovationscenter for Økologisk Landbrug	6.184.720
Automated adjustment of fodder and sugar beet stands (CROPCUT)	Bo Melander, Institut for Agroøkologi, Aarhus Universitet	4.717.504
Tannins of willow and hemp as organic feed additive for methane reduction in dairy cows (ECOCO2W)	Natalja Nørskov, Institut for Husdyrvidenskab, Aarhus Universitet	7.669.477
Eco-efficienT pig pRoduction ANd loCal protEin supply (ENTRANCE)	Simme Eriksen, Center for Frilandsdyr	7.937.176
Breeding oat varieties with nematode resistance, high yield and agronomic traits beneficial for organic agriculture (Oatganic)	Ahmed Jahoor, Nordic Seed	1.565.800
Demonstrating and improving the benefit of organic farming on biodiversity and the environment (Organic+)	Yoko Luise Dupont, Institut for Ecoscience, Aarhus Universitet	6.726.366
Pea yield stability, taste and quality – potential of old cultivars for increased organic pea production (PEAS & LOVE)	Dorte Bodin Dresbøll, Institut for Plante- og Miljøvidenskab, Københavns Universitet	7.404.090
Protein from locally grown legumes and algae for organic chickens (ProLocAL)	Sanna Steinfeldt, Institut for Husdyrvidenskab, Aarhus Universitet	5.654.214
