

Join us at the **ORGANIC FARMING and SOIL MANAGEMENT** session (SSS10.1)
European Geoscience Union General Assembly, Vienna 8 – 13 April 2018

Abstract submission deadline: 10 January 2018 13:00 CET

“**ORGANIC FARMING** is a production system that sustains the health of soils, ecosystems and people. It relies on ecological processes, biodiversity and cycles adapted to local conditions, rather than the use of inputs with adverse effects” (IFOAM).

- ❖ This Session invites you to contribute with your experience in **sustainable agriculture** in relation to:
 - **Soil changes** (biota, water, mineral and organic matter, erosion)
 - **Soil productivity**
 - **Socio-economic aspects.**
 - **Plant protection**
 - **Food quality**
- ❖ Studies focused on **optimal energy efficiency, water and carbon footprint, greenhouse gases (GHG) and soil nutrient balancing as indicators of sustainable agricultural practices**, are also welcomed.
